- 1 A great space to work in — even when
- 2 you're travelling

- 3 *The new DESK.WORKS app is revolutionizing the world of*
- 4 *work*

- 5 Those travelling on business and looking for a quiet
- 6 space to work in now no longer need to surrender to
- 7 working from cafés or train stations. The ideal
- 8 alternative to finding a great workspace starts with the
- 9 new DESK.WORKS app.

- 10 Journalists, freelancers and, even, startups looking for
- 11 space can book a workspace at their current location or
- 12 at any desired location simply and in less than 60
- 13 seconds with a couple of clicks via the <http://desk.works>
- 14 website. They are directed straight to the workspace via
- 15 the app's sat-nav and can therefore get straight to work.
- 16 They have the choice of booking using a monthly or daily
- 17 flat rate, depending on the length of time they need the
- 18 workspace for.
- 19 The benefits are obvious: Besides a quiet working
- 20 atmosphere they'll find standard office furniture to hand
- 21 that they can use without them having to buy this
- 22 themselves.

- 23 The benefits for those renting workspaces are also
- 24 obvious. Besides monetizing empty, unused workspaces
- 25 scouting personnel is an unbeatable argument in favor
- 26 of DESK.WORKS: How else would you get introduced to
- 27 different experts across so many different industries
- 28 right in your own workspace?

- 29 Scheduled staff appraisals often go hand-in-hand with an
- 30 unrelaxed atmosphere. This is in stark contrast with
- 31 exchanging ideas whilst co-working and networking
- 32 which leads the way to the most open-ended
- 33 collaborations and inspiration possible.

34 DESK.WORKS has various options available and achieves
35 a WIN-WIN situation for those looking for workspaces as
36 well as those offering workspaces for rent. Those who
37 take advantage of this will be able to revolutionize their
38 own workspace. Nothing else but a grasp for its
39 potential and an interest in people is required.

40 DESK.WORKS provides complete system solutions for
41 companies with empty units.

42 The DESK.WORKS app has become the largest co-
43 working space service within just 6 weeks after being
44 launched. Half of all downloads come from the USA, the
45 other 50% of downloads are from German speaking
46 countries (Austria and Germany). "This rate of
47 downloads documents the desire for modern
48 workspaces," said a happy Waldemar Ariel, founder and
49 CEO of DESK.WORKS, on the first milestone for the use
50 of his app.

51 DESK.WORKS Sp. z o.o. has offices in the USA, Germany
52 and Poland. ###
